45. Final report on the EA 1729 Program, EA 1729 Research Program. Summary of Work Completed from April 1966 to January 1967, dated 10 March 1967.

46. Transmittal of Report on LSD, dated 11 February 1966.

47. Applied Biology Committee, 19 October 1967, subject: The Biological Actions of LSD 25 on the Antagonism of Its Effects.

48. CRDLR 3226, The Human Assessment of EA 1729 and EA 3538 by the Inhalation Route, dated July 1964.

49. CRDL letter, subject: Review for Future Actions, Incapacitating Agents, dated 25 May 1965.

50. CRDL Disposition Form, subject: Research Design Planning for Future Clinical Studies with EA 1729, dated 25 February 1963.

51. The United States Patent Office Affidavit, Case 291, appeals stamp, dated 27 June 1947.

52. Human Investigation Branch, Edgewood letter, subject: Projected BA Program, dated 23 August 1962.

53. US Army CRLDR 3199, Physiological Action on BZ on Men Subjected to High Termperatures and Exercise, dated February 1964.

54. Edgewood Arsenal Technical Report EATR 4140, The Human Assessment of BZ Disseminated Under Field Conditions, dated November 1967.

55. Edgewood Arsenal Technical Report EATR EA 3167, Effects in Man, dated October 1972.

56. Human Studies with BZ and Related Compounds, an Interim Report, dated March 1963.

57. Materiel Analysis, Military Evaluation of Temporary Incapacitating Agent, LSD, dated 19 July 1966.

58. CRDL Technical Memorandum 20-29, The Human Assessment of BZ, dated August 1963.

59. Research Plan, title: Minimal Effective Dose of BZ by the Intramuscular Route in Man, dated March 1965.

60. Research Plan Number 7016, initiated 29 June 1964, titled: Effects of Parenteral Administration of the Combined Isomers 2 and 4 of EA 2233
